| Engine                         | Standby rating             | Prime rating           |  |  |
|--------------------------------|----------------------------|------------------------|--|--|
| Engine manufacturer            | Cummins                    | Cummins                |  |  |
| Engine model                   | 4BTAA3.3-G13               |                        |  |  |
| Configuration                  | In-line, 4 cylinder diesel | l                      |  |  |
| Aspiration                     | Turbocharged and after     | r-cooled               |  |  |
| Gross engine power output, kWm | 62.6                       | 58                     |  |  |
| BMEP at set rated load, kPa    | 1538                       | 1428                   |  |  |
| Bore, mm                       | 95                         |                        |  |  |
| Stroke, mm                     | 115                        |                        |  |  |
| Rated speed, rpm               | 1500                       |                        |  |  |
| Piston speed, m/s              | 5.75                       |                        |  |  |
| Compression ratio              | 19:1                       |                        |  |  |
| Lube oil capacity, L           | 8                          |                        |  |  |
| Overspeed limit, rpm           | 1650                       |                        |  |  |
| Regenerative power, kW         | N/A                        | N/A                    |  |  |
| Governor type                  | Mechanical as standard     | Mechanical as standard |  |  |
| Starting voltage               | 12 V DC                    |                        |  |  |

### **Fuel flow**

| Maximum fuel flow, L/hr                              | 45    |
|--|-------|
| Maximum fuel inlet restriction, mm Hg (clean filter) | 101.6 |
| Maximum fuel inlet temperature, °C                   | 70    |

| Air                                  | Standby rating | Prime rating |
|--------------------------------------|----------------|--------------|
| Combustion air, m <sup>3</sup> /min  | 4.64           | 4.19         |
| Maximum air cleaner restriction, kPa | 2.5            |              |

#### Exhaust

| Exhaust gas flow at set rated load, m <sup>3</sup> /min | 10.64 | 9.76 |
|---|-------|------|
| Exhaust gas temperature, °C                             | 491   | 483  |
| Maximum exhaust back pressure, kPa                      | 10    |      |

# Standard set-mounted radiator cooling

| Ambient design, °C @ 12.7mm H <sub>2</sub> O                            | 55      |      |
|---|---------|------|
| Fan Ioad, kW <sub>m</sub>   | 2 +/- 1 |      |
| Coolant capacity (with radiator), L                                     | 10.3    |      |
| Cooling system air flow, m <sup>3</sup> /sec @ 12.7 mm H <sub>2</sub> O | 1.611   |      |
| Total heat rejection, Btu/min   | 1744    | 1560 |
| Maximum cooling air flow static restriction, mm H <sub>2</sub> O        | 25.4    |      |

| Weights                             | Open | Enclosed      |
|-------------------------------------|------|---------------|
| Unit dry weight, kg (standard skid) | 922  | 1236 / 1202** |
| Unit wet weight, kg (standard skid) | 1010 | 1414 / 1328** |
| Unit dry weight, kg (optional skid) | 1140 | 1543          |
| Unit wet weight, kg (optional skid) | 1228 | 1631          |

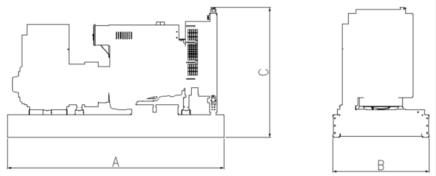

\*\*Note: Weights and dimensions are for Chassis lifting arrangement option.

| Dimensions                              | Length        | Width       | Height        |
|---|---------------|-------------|---------------|
| Open set dimensions (standard skid)     | 2050          | 967         | 1510          |
| Enclosed set dimensions (standard skid) | 2270 / 2276** | 975 / 973** | 1920 / 1793** |
| Open set dimensions (optional skid)     | 2270          | 967         | 1720          |
| Enclosed set dimensions (optional skid) | 2270          | 975         | 2115          |

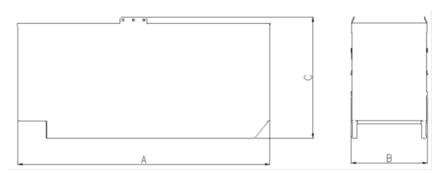

\*\*Note: Weights and dimensions are for Chassis lifting arrangement option.

## **Genset outline**

Open set

#### Enclosed set

Outlines are for illustrative purposes only. Please refer to the genset outline drawing for an exact representation of this model.

### **Alternator data**

| Connection <sup>1</sup> | Temp rise ºC | Duty <sup>2</sup> | Alternator | Voltage |
|-------------------------|--------------|-------------------|------------|---------|
| Wye, 3-phase            | 163/125      | S/P               | UCI22 4C   | 380-415 |
| Wye, 3-phase            | 150/105      | S/P               | UCI22 4D   | 380-415 |

### **Ratings definitions**

| Emergency Standby   | Limited-Time running  | Prime Power (PRP):   | Base load (Continuous)   |
|---|---|--|--|
| Power (ESP):  | Power (LTP):  |  | Power (COP):   |
| Applicable for supplying<br>power to varying electrical<br>load for the duration of<br>power interruption of a<br>reliable utility source.<br>Emergency Standby Power<br>(ESP) is in accordance with<br>ISO 8528. Fuel Stop power<br>in accordance with<br>ISO 3046, AS 2789 and<br>DIN 6271. | Applicable for supplying<br>power to a constant<br>electrical load for limited<br>hours. Limited-Time<br>Running Power (LTP) is in<br>accordance with ISO 8528. | Applicable for supplying<br>power to varying electrical<br>load for unlimited hours.<br>Prime Power (PRP) is in<br>accordance with ISO 8528.<br>Ten percent overload<br>capability is available in<br>accordance with ISO 3046,<br>AS 2789 and DIN 6271. | Applicable for supplying<br>power continuously to a<br>constant electrical load for<br>unlimited hours. Continuous<br>Power (COP) is in<br>accordance with ISO 8528,<br>ISO 3046, AS 2789 and<br>DIN 6271. |

#### Formulas for calculating full load currents:

| Three phase output   | Single phase output           |  |
|----------------------|-------------------------------|--|
| kW x 1000            | kW x SinglePhaseFactor x 1000 |  |
| Voltage x 1.73 x 0.8 | Voltage                       |  |
