

Diesel generator set X2.5 series engine

15 kVA - 28 kVA 50 Hz
 10.8 kW - 20 kW 60 Hz

Description

This Cummins® commercial generator set is a fully integrated power generation system, providing optimum performance, reliability, and versatility for Stationary Standby, Prime Power, and Continuous Duty applications.

Features

Cummins heavy-duty engine - Rugged 4-cycle industrial diesel delivers reliable power, low emissions and fast response to load changes.

Optional excitation boost system (EBS) - Offers enhanced motor starting and fault clearing short circuit capability.

Alternator - Several alternator sizes offer selectable motor starting capability with low reactance 2/3 pitch windings; low waveform distortion with non-linear loads and fault clearing short-circuits capability.

Cooling system - Standard integral set-mounted radiator system, designed and tested for rated ambient temperatures, simplifies facility design requirements for rejected heat.

Control system - PowerStart control, microprocessor-based generator set monitoring and control system provides a simple operator interface to the generator set, manual and remote start/stop control and shutdown fault indication.

Enclosures - Optional weather-protective and sound-attenuated enclosure.

Warranty - Backed by a comprehensive warranty and worldwide distributor network.

Generator set specifications

| | |
|--|-----------------------------------|
| Governor regulation class | ISO 8528 G2 |
| Voltage regulation, no load to full load | ± 2.5% |
| Random voltage variation | ± 2.5% |
| Frequency regulation | Droop |
| Random frequency variation | ± 0.75 % |
| Radio frequency emissions compliance | BS EN 61000-6-1 / BS EN 61000-6-3 |

Engine specifications

| | |
|-----------------------------|---|
| Design | 4 cycle, in-line, naturally aspirated |
| Bore | 91.4 mm |
| Stroke | 127 mm |
| Displacement | 2.5 liter (153 in ³) |
| Cylinder block | Alloy cast iron, in-line, 3 cylinder |
| Battery charging alternator | 36 A |
| Starting voltage | 12 volt, negative ground |
| Fuel system | Direct injection |
| Fuel filter | Spin on fuel filters with water separator |
| Air cleaner type | Dry replaceable element |
| Lube oil filter type(s) | Spin on full flow filter, filtration efficiency 25 micron 99% (min) |
| Standard cooling system | 122 °F (50 °C) ambient radiator with coolant recovery system |

Alternator specifications

| | |
|--|--|
| Design | Brushless, single bearing |
| Stator | 2/3 pitch |
| Insulation system | Class H |
| Standard temperature rise | 125-163 °C |
| Exciter type | Self excited |
| Phase rotation | A (U), B (V), C (W) |
| Alternator cooling | Direct drive centrifugal blower fan |
| AC waveform Total Harmonic Distortion (THDV) | No load to full linear load < 5%. For any single harmonic < 3% |
| Telephone Influence Factor (TIF) | < 50% per NEMA MG1-22.43 |
| Telephone Harmonic Factor (THF) | < 3% |

Available voltages

| 50 Hz Line-Line/Line-Neutral | | 60 Hz Line-Line/Line-Neutral | | |
|---|---|---|---|--|
| 3-phase | 1-phase | 3-phase | 1-phase | |
| <ul style="list-style-type: none"> • 416/240 • 400/230 • 380/220 | <ul style="list-style-type: none"> • 208/120 • 200/115 • 190/110 | <ul style="list-style-type: none"> • 230 | <ul style="list-style-type: none"> • 480/277 • 440/255 • 416/240 | <ul style="list-style-type: none"> • 220/127 • 240 |

Note: Consult factory for other voltages.

Generator set options

Engine

- Electronic engine governing
- Coolant heater 120/240 V

Cooling

- Antifreeze 50/50 (Ethylene glycol)

Enclosure

- Optional silent power canopy

Base frame

- Dual skin fully contained fuel tank

- 500 litre fuel tank
- Set mounted battery

Alternator

- Alternator heater
- Auxiliary Winding alternator

Control panel

- PowerCommand 1.1
- 2/4 pole main circuit breaker
- Aux 101

Warranty

- 2 years for Prime application
- 5 years for Standby application

- 1500/3000 hours service kit
- Optional language literature
- Engine oil heater 120/240 V
- External fuel fill (3 way valve)

Note: Some options may not be available on all models - consult factory for availability.

Control system

Generator set control PowerStart 500 - The PowerStart control is a microprocessor-based generator set monitoring and control system. The control provides a simple operator interface to the generator set, manual and remote start/stop control and shutdown fault indication. The integration of all control functions into a single control provides enhanced reliability and performance compared to conventional generator set control systems. This control has been designed and tested to meet the harsh environment in which gensets are typically applied.

- The PowerStart generator set control is suitable for use on a wide range of generator sets in non-parallel applications. It is suitable for use with reconnectable or non-reconnectable generators, can be configured for either 50 Hz or 60 Hz and voltage and power connection from 190-600 VAC Line-to-Line.
- This control includes an intuitive operator interface that allows for complete genset control as well as system metering, fault annunciation, configuration and diagnostics. The interface includes seven generator set status LED lamps with both internationally accepted symbols and English text to comply with customer needs. The interface also includes an LED backlit LCD display with tactile-feel soft-switches for easy operation and screen navigation. The manual/auto/stop switch function is integrated into the interface panel.
- All data on the control can be viewed by scrolling through screens with the navigation keys. The control displays the current active fault and a time-ordered history of the five previous faults.
- Power for this control is derived from the generator set starting batteries and functions over a voltage range from 8 VDC to 16 VDC.

Major Features

- LCD display – 16 characters x 2 line alphanumeric LED backlight LCD.
- Generator set monitoring and protection.
- 12 VDC battery operation.
- Engine starting – Includes solid state output to operate external relays start the engine, Fuel Shut Off (FSO), and glow plugs. Start disconnect is achieved by monitoring main alternator frequency.
- Remote start capability – Interface to transfer switch.
- Environmental protection – The control is designed for reliable operations in harsh environments.
- Warranty and service – Backed by a comprehensive warranty and worldwide distributor service network.
- Certification – Suitable for use on generator sets are designed, manufactured, tested and certified to relevant ISO, IEC Mil Std. and CE standards.

Base control functions

LCD display – 16 character x 2 line alphanumeric LED backlight LCD.

Operation interface – Six tactile-feel membrane switches for LCD navigation, genset operation and control setup. These switches are indicated by internationally accepted symbols and English text.

Data logs – Includes engine run time and controller on time.

Fault history – Provides a record of the most recent fault conditions with control hour's time stamp. Up to 5 events are stored in the control non-volatile memory.

Alternator data

- Voltage (single or three phase Line-to-Line and Line-to-Neutral).
- Current (single or three phase).
- KVA (three phase and total).
- Frequency.

Engine data

- Starting battery voltage.
- Engine running hours.
- Engine temperature.
- Engine oil pressure.

Service adjustments – The control includes provisions for adjustment and calibration of generator set control functions. Functions include:

- Voltage selection.
- Frequency selection.
- Configurable input set up.
- Configurable output set up.
- Meter calibration.
- Units of measurement.

Protective functions

On operation of a protective function the control will indicate a fault by illuminating the appropriate status LED, as well as display the fault code and fault description on the LCD. The nature of the fault and time of occurrence are logged in the control. The service manual and InPower Service Tool provide service keys and procedures based on the service codes provided.

Field control interface

Input signals to the base control include

- Remote start.
- Local and emergency stop.
- Configurable inputs: Control includes (4) input signals from customer.

Output signals from the control include

- Configurable output: Control includes (1) solid state driver rated at 1 A. This output can be configured to activate on ready to load, or common warning and common shutdown condition.

Communications connections include

- PC tool interface: This RS-485 communication port allows the control to communicate with a personal computer running InPower software.

Note – An RS-232 or USB to RS-485 converter is required for communication between PC and control.

PowerStart 500 control operator /display panel

Ratings definitions

Emergency Standby Power (ESP):

Applicable for supplying power to varying electrical load for the duration of power interruption of a reliable utility source. Emergency Standby Power (ESP) is in accordance with ISO 8528. Fuel Stop power in accordance with ISO 3046, AS 2789, DIN 6271 and BS 5514.

Limited-Time Running Power (LTP):

Applicable for supplying power to a constant electrical load for limited hours. Limited Time Running Power (LTP) is in accordance with ISO 8528.

Prime Power (PRP):

Applicable for supplying power to varying electrical load for unlimited hours. Prime Power (PRP) is in accordance with ISO 8528. Ten percent overload capability is available in accordance with ISO 3046, AS 2789, DIN 6271 and BS 5514.

Base Load (Continuous) Power (COP):

Applicable for supplying power continuously to a constant electrical load for unlimited hours. Continuous Power (COP) in accordance with ISO 8528, ISO 3046, AS 2789, DIN 6271 and BS 5514.
