PROTEZIONI E ACCESSORI	PROTECTION AND ACCESSORIES	PROTECTION ET ACCESSOIRES	SCHUTZ UND ZUBEHÖR	PROTECCIONES Y ACCESORIOS
Tutti i generatori saldatrici sono protetti termicamente in caso di sovraccarichi prolungati e si ripristinano automaticamente. L'intervento della protezione termica è segnalato da un indicatore luminoso. Il grado di protezione standard è IP 23 su specifica richiesta del cliente possono essere forniti gradi di protezione superiori.	All welder generators are equipped with a thermal protection device which intervenes, in case of overload, and self restore it, the thermal invention is signal from lumino spot. The standard degree of protection is IP 23, upon the customer's request, other higher degrees of protection, are available.	Toutes les génératrices de soudage sont protégées thermiquement en cas de surcharges prolongées. Le retour à la tension nominale s'effectue automatiquement. L'intervention de la protection thermique est signalée par un voyant lumineux. Sur demande spécifique du client, des degrés de protection supérieurs peuvent être fournis.	Alle Schweiß-generatoren, sowohl Wechselstrom als auch Gleichstromgeneratoren, sind bei län-geren Überbelastungen thermisch geschützt und stellen sich automatisch wieder zurück. wird der Eingriff des Wärme-schutzes außerdem durch eine Kontrolllampe angezeigt. Standard - schutzklasse ist IP 23; auf ausdrücklichen wunsch des kundel sind höhere.	Todos los generadores - soldadoras estan protegi-dos termicamente en caso de sobrecarga prolongado Y se resetan automaticamente un indicador luminoso señala la intervecion de la proteccion termica. El grado de proteccìon standard es IP 23, bajo pedido especifico del cliente pueden suministrarse grados de protecciòn superiores.

SMANTELLAMENTO, SUDDIVISIONE DIFFERENZIATA DEI MATERIALI

L'alternatore è costituito quasi esclusivamente da: alluminio, ghisa, rame, ferro, PVC caricato vetro. Tutti i materiali precedentemente citati dovranno essere smaltiti in ottemperanza alle vigenti disposizioni di legge. La macchina non contiene piombo, mercurio, cadmio o cromo esavalente.

DISMANTLING AND SEPARATION OF MATERIALS FOR DISPOSAL

The alternator is almost exclusively made of: aluminum, cast iron, copper, iron, PVC loaded with glass. All above mentioned materials must be disposed of complying with the standards in force.

COMPOSITION DES DIFFERENTS MATERIAUX

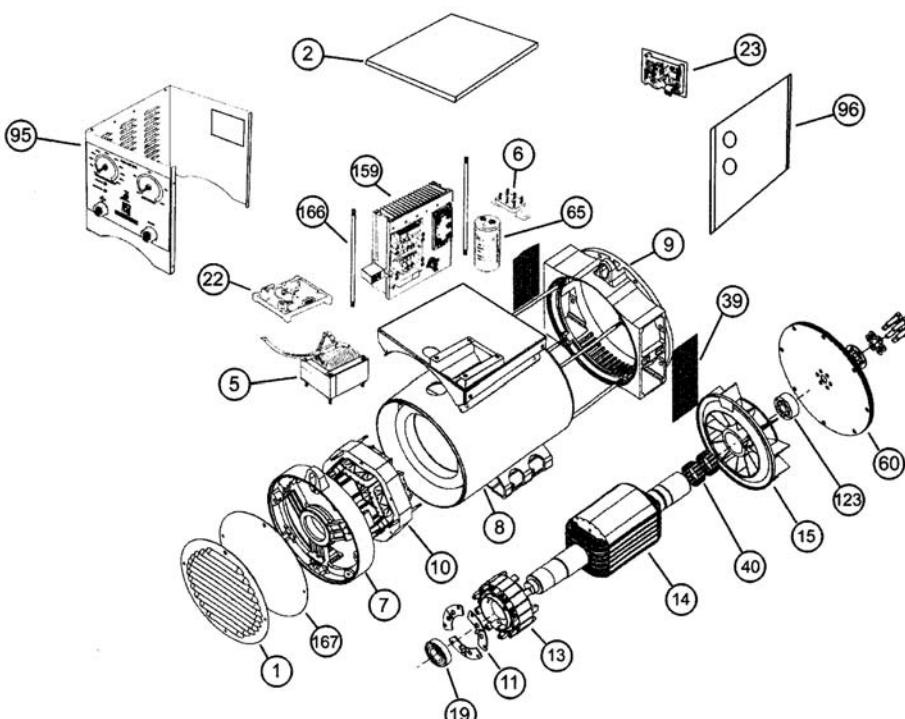

L'alternateur est constitué presque exclusivement par: aluminium, fonte, cuivre, tole magnétique, isolant à base de matériaux vitrifiés, plastique. Tous les matériaux ci-dessus décrits doivent être mis hors consommation en conformité avec les dispositions de la loi.

ENTSORGUNG, MATERIAL TRENNUNG

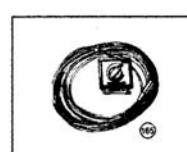

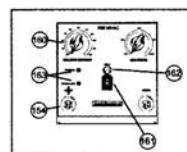

Der Wechselstromgenerator setzt sich fast vollständig aus folgenden Materialen zusammen: Aluminium, Gussisen, Kupfer, Stahl, glasverstärktes PVC. Alle vorstehenden Materialen sind in Obereinstimmung mit den geltenden Gesetzesvorshriften zu entsorgen.

EVACUACIÓN Y DIVISION DIFERENCIADA DE LOS MATERIALES

El alternador es constituido casi exclusivamente por: aluminio, fundición, cobre, hierro, PVC cargado vidrio. Todos los materiales mencionados en precedencia tendrán que ser evaquados siguiendo las disposiciones de la ley en vigor.
